Sarah Chen

Engineering Manager

Example Corp

Singapore (Remote)

RE: Application for Senior Fullstack Developer (Remote)

Dear Sarah Chen,

I am writing to express my strong interest in the **Senior Fullstack Developer** position at **Example Corp**. Having spent years building financial platforms that serve traders across 69 countries, I understand the unique challenges of building payment systems for Southeast Asian markets — from regulatory compliance to multi-currency processing at scale.

With over **10 years of fullstack engineering experience** spanning fintech, e-commerce, and SaaS domains, I bring a rare combination of architectural depth and hands-on execution. My work has ranged from building payment gateways processing transactions across **69 countries** to designing real-time trade synchronization systems using WebSocket and microservices architecture.

What draws me to this role at Example Corp is the opportunity to apply my expertise in React, Next.js, TypeScript, Node.js, and NestJS to deliver real impact. Specifically:

- Architected a forex trade copier SaaS with real-time WebSocket synchronization across MetaTrader 4/5 and cTrader
- Built a fintech client portal serving global traders with KYC compliance (SumSub) and multi-PSP payment processing
- Designed microservices architecture for a freelance marketplace with AI-powered matching and CI/CD pipelines

I am particularly excited about Example Corp's work in Fintech, and I believe my background in delivering distributed, remote-first engineering solutions at scale aligns well with your team's goals. I thrive in environments where engineering excellence meets business impact — and I am confident I can contribute meaningfully from day one.

I would welcome the opportunity to discuss how my experience and skills can contribute to Example Corp's continued success. I am available for a conversation at your earliest convenience and can be reached at +62 813 9825 3186 or fxwisdom1@gmail.com.

Thank you for your time and consideration.

Sincerely,

Agustinus Biotamalo Lumbantoruan

Position: Senior Fullstack Developer • **Company:** Example Corp • **Type:** full-time • **Location:** Singapore (Remote) • **Salary:** SGD 8,000 – 12,000 / month
